PROFILE

B.Tech Information Technology graduate with hands-on experience in **data handling, Python automation, SQL, AI APIs, and workflow automation**. Built AI-assisted applications and an autonomous job-application agent that combines browser automation, structured data processing, resume optimization, API integration, and human-in-the-loop workflows. Strong analytical problem-solving skills with a practical focus on reducing repetitive work and improving process efficiency.

EDUCATION

Bachelor of Technology — Information Technology Sir CR Reddy College of Engineering, Eluru 2021–2025 CGPA: 7.79	Eluru, India
Intermediate (MPC) SASI Junior College 2019–2021 91.9%	Velivennu
SSC Lotus High School 2019 74.6%	Tadepalligudem

PROJECTS

AI Autonomous Job Application Agent | Python, Playwright, Gemini/OpenAI APIs, REST APIs, JSON

- Built an AI-assisted automation workflow that evaluates job links, extracts job requirements, maps them against a master resume, and prepares a job-specific resume/application workflow.
- Automated browser navigation and form interaction with Playwright, including structured question handling, answer suggestions, duplicate-protection logic, application history, and human-in-the-loop final review.
- Designed reusable modules for resume processing, browser automation, LLM integration, job/application state management, and workflow control.

AI-Powered Code Review Assistant | Python, GPT-4 API

- Engineered an automated code-review pipeline that parses code submissions and uses an AI API with prompt engineering to generate structured, actionable feedback.
- Built output-parsing and iterative prompt-refinement logic to convert raw AI responses into consistent review results.

3D Hub — Streaming & Media Discovery Platform | Next.js, Firebase, YouTube Data API, Vercel

- Built a media discovery platform with search, Movies, Music, 3D Video and Immersive Audio sections, using server-side API integration and cached content retrieval.
- Implemented Firebase Authentication, Firestore-backed playlists/watch history, Favorites/Watch Later, and a responsive mobile-first interface.

FaceTally — Face Detection, Recognition & Counting Web App | Python, Flask, OpenCV, Firebase, Cloud Firestore

- Developed a web application for detecting, recognizing, and counting faces in uploaded photos and videos.
- Implemented authenticated per-user known-face storage and persistent deployment storage for reference data.

TECHNICAL SKILLS

Programming & Data: Python, SQL, Pandas, NumPy, data cleaning, structured data processing, SQL queries/joins/schema design

Automation & AI: Playwright, browser automation, REST APIs, JSON, Gemini/Google GenAI, OpenAI APIs, prompt engineering, workflow automation

Web & Cloud: Flask, Next.js, Firebase Authentication, Cloud Firestore, AWS S3, Vercel

Tools: Excel/MS Office, Git, GitHub, VS Code, Google Colab

INTERNSHIP

Amazon Web Services (AWS) Intern — BrainOvision | AWS, Cloud Computing

- Gained practical exposure to cloud computing concepts, data storage, and application deployment on AWS.

CERTIFICATION

- Python for Data Science — IBM Skills Network (Foundation Level)

STRENGTHS

Analytical and problem-solving ability • Quick learner • Adaptable to new tools • Process-oriented • Collaborative team player
